GLOSSARY

Treated Softwood

We use good quality European and Scandinavian softwoods. The components are selected, machined and finally treated to ensure that the joints are properly preserved. Some splitting or cracks may occur, especially in periods of hot weather.

Sapele

Sapele is a durable industrial quality hardwood with a mahogany colour. For all applications where a tough utilitarian hardwood is required. It's appearance and longevity will benefit from a coat or two of preservative or alternatively will readily accept a painted finish. Some splitting or cracks may occur especially in periods of hot weather, this does not generally affect the strength and durability of the gates and is therefore not seen as a defect.

Iroko

Iroko is a top quality hardwood, yellowish brown in colour and similar to teak in its texture and properties. Makes a superb entrance gate. Very durable. Use Sikken's or Sadolins to preserve the colour. The most resistant to splitting or cracking.

Non standard width

Add £10.00 on to next size up. (This does not apply to Albion gates).

| Standard Gate Sizes – Width | | | | | | | | | | |
|-----------------------------|-----------|-----------|-------|-------|-----------|-----------|-----------|-------|-----------|-----------|
| mm | 900 | 1200 | 1500 | 1800 | 2100 | 2400 | 2700 | 3000 | 3300 | 3600 |
| feet | 2'11 1/2" | 3'11 1/4" | 4'11" | 5'11" | 6'10 1/2" | 7'10 1/2" | 8'10 1/4" | 9'10" | 10'9 3/4" | 11'9 3/4" |

| Standard Gate Sizes – Height | |
|---|------------------|
| The o/a height of the gates is 1195mm (47") apart from the Yeoman which is: standard 1700mm (67") | |
| small | 1300mm (51 1/4") |

Hang Your Gates

POSITIONING NEW POSTS

There are two ways to hang a gate – either on the backs of or between the posts. Normally gates are hung on the backs of posts, but some situations require that they should be hung between - so that they open both ways for instance. In either case the posts must be placed accurately according to the width of the gate, and making allowance for the fittings to be used. The diagrams below show how to calculate the distance between the posts with recommended fittings.

N.B. Slightly different arrangements are necessary when either BG rising hinges or an Offset Bottom Hinge set is used.

1. Single gate hung on the backs of posts – gate opens inwards.
Distance between posts = width of gate less 50 mm (2"). Gate overlaps each post by 25mm (1"). Standard hanging sets recommended with either an Auto catch or Spring Fastener.

2. Pair of gates hung on back of posts – gate opens inwards.
Distance between posts = combined width of gates less 38 mm (1 1/2"). Gates overlap posts by 25 mm (1"). With 12 mm (1/2") gap between centres. Adjustable Hanging Sets recommended, with a Loopover Fastener and drop bolt(s).

3. Single gate hung between posts – gate opens either way.
Distance between posts = width of gate plus 192 mm (7 1/2") allows 110 mm (4 1/2"). For standard Hanging Set and 82 mm (3 1/2") for Chelsea Catch.

4. Pair of gates hung between posts – gate opens either way.
Distance between posts = combined width of gates plus 241 mm (9 1/2"); allows 110 mm (4 1/2") for each Adjustable Hanging Set, and 12 mm (1/2") gap between gates. Loopover Fasteners and Drop bolt(s) are recommended.

The hook is correctly positioned when there is 57 mm (2 1/4") between centre of the pin and face of the post.

The same applies when hanging between posts, allowing 110 mm (4 1/2") between gate and post altogether.

POSITIONING THE HOOKS IN THE POST

Ideally a gate should hang so that it is about 50 mm (2") off the ground. This height will be determined by the positioning of the hooks in the posts. The correct position for the four basic hanging sets is shown below.

For 305 mm Standard Hanging Set

- A. Lower hook 15 cm (6") from ground
- B. Upper hook 104 cm (41") from ground
- C. Bearing surface distance (i.e. the distance between the upper of the hooks - the faces on which the hinges rest) – 89 cm (35")

For 610 mm Standard Hanging Set

- A. Lower hook 15 cm (6") from ground
- B. Upper hook 101 cm (40") from ground
- C. Bearing surface distance – 86 cm (34")

For 305 mm Adjustable Hanging Set

- A. Lower hook 30 cm (12") from ground
- B. Upper hook 104 cm (41") from ground
- C. Bearing surface distance – 73 cm (29")

For 610 mm Adjustable Hanging Set

- A. Lower hook 30 cm (12") from ground
- B. Upper hook 101 cm (40") from ground
- C. Bearing surface distance – 71 cm (28")

N.B. If the existing hooks are positioned differently from the above, it may be possible to adjust the position of the hinges on the gate to compensate.

FIELD GATE FITTINGS

| Stock No | Galvanised | | Prices |
|----------|---|-------|---------|
| 1301001 | Top Ride Hinge | 610mm | £ 9.51 |
| 1301002 | Bottom Ride Hinge | 125mm | £ 3.74 |
| 1301007 | Top Ride Hinge | 305mm | £ 8.57 |
| 1301008 | Bottom Ride Hinge | 87mm | £ 3.40 |
| 1301102 | Adjustable Bottom Hinge | | £ 8.34 |
| 1301003 | Top Hook to Bolt | 280mm | £ 5.86 |
| 1301005 | Top Hook to Bolt | 330mm | £ 4.89 |
| 1301004 | Bottom Hook to Drive | 215mm | £ 3.44 |
| 1301006 | Standard Hanging Set | 610mm | £ 23.27 |
| 1301009 | Standard Hanging Set | 305mm | £ 21.38 |
| 1301050 | Adjustable Hanging Set | 610mm | £ 26.94 |
| 1301076 | Adjustable Hanging Set on 100 x 100mm plates | 610mm | £ 31.24 |
| 1301051 | Adjustable Hanging Set | 305mm | £ 26.47 |
| 1301072 | Adjustable Hanging Set on 100 x 100mm plates | 305mm | £ 29.70 |
